

## **Case Closure Policy**

### **Cases may be closed in the following circumstances:**

- Social work objectives / goals/outcomes based on assessment or review have been achieved and no further input is required.
- The client requires ongoing support but there is no role for Social Care
- Client (with capacity) declines further support and there is no statutory reason (e.g. safeguarding concerns, eligible unmet needs) for work to continue
- The client/ family moves permanently to another area and there is no reason for continued involvement by us or there has been a transfer to the new local authority area

### **Audit Process**

The Case Audit Tool tasks check list and case closure checks procedure explains what is required in order to process the closure of a client's case/record on LAS. It should be used before every case closure, either in supervision or in a dedicated session.

Good quality endings of social work /other intervention and closing of cases is equally as important as the way in which relationships are built at the beginning of any intervention. If a case is closed in a planned manner then this lays a good base for if there needs to be any involvement in the future.

The allocated Social Worker/allocated worker will notify the Team Manager that the client's record (referral) is ready for closure. A closure discussion will take place and will be recorded in case notes by the Team Manager. The Team Manager will record the discussion and decision of whether the closure is agreed or whether further actions are required.

The Team Manager will check that there is evidence on the client's record that the Social Worker/allocated worker has completed the actions above.
