Welcome!

Welcome to the Newcastle upon Tyne Multi-agency Safeguarding Arrangements for Children and Young People.

The multi-agency safeguarding arrangements we originally published in June 2019 have been independently reviewed, which has informed the revision of how we will fulfil our statutory responsibilities.

We are committed to improving positive outcomes for all children and young people in Newcastle and are proactive in driving forward improvements to reduce the risk of abuse and neglect.

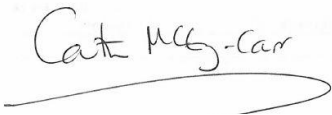

Our ambition is to provide help and support to children, young people, and families at the earliest opportunity to ensure that low level emerging need is identified and responded to in a timely way.

In Newcastle we have a proven track record of strong partnership working. It is our intention to continue to build upon the excellent work already achieved.

As Safeguarding Partners, we are committed to improving how we all work to safeguard our children and adopt a flexible approach to change and improvement.

The document sets out how, we, the Safeguarding Partners will work together and with other agencies, to safeguard and promote the welfare of all children in Newcastle.

The term 'children' used throughout the document refers to both children and young people.

6. Geographical Area

6.1. The boundaries of the safeguarding arrangements are the same as those for Newcastle City Council. 7. Strategic Priorities

7.1. The Statutory Partners work with the wider partnership to consider known and emerging safeguarding issues affecting young people in Newcastle to develop a set of strategic objectives on an annual basis.

In the North East the partners of 6 Local Authority areas have combined to create a regional body called the North and South of Tyne CDOP.

8.2. The CDOP is the final assurance point once all multi-agency information has been collected, collated and analysed at a local level via a Child Death Review Meeting which includes professionals who have known the child and family. The aim of the CDOP is to review deaths to identify potential safeguarding or local health issues that could be modified to protect children from harm and, ultimately, save lives.
