

4 THINGS YOU DIDN'T KNOW ABOUT ...

MindOfMyOwn

It's available in over 100 languages

Hearing the voice of children who don't speak English as a first language has never been easier. Young people can now translate the One app in over 100 languages. But don't worry, their statement will come through to you in English so you don't have to re-translate what they've said.

ASK US HOW TO TRANSLATE THE APP

It helps safeguard our children

Young people can use Mind Of My Own to prepare for meetings, sort problems, share good news and more. They can even say they feel unsafe or scared. If they choose to say these things using the app, you will be notified immediately.

ASK US ABOUT OUR SAFETY LINK PROCESS

It saves you time

When a child uses Mind Of My Own you will be sent a pdf of what they said. It's written by them, in their own voice, and contains everything they want to say. This saves you time because you don't need to write up their views. All you need to do is save the statement to their case file. Quick, easy, effective.

It can monitor every child's wellbeing

Not many people know the children & young people you work with as well as you. An app won't change that. But the My Wellbeing feature will help you identify risk & resilience indicators for every child you're working with. Log into your worker account and use the 'Test' area to see for yourself.
