

FITTING SLIDE SHEET WITHOUT ROLLING THE PERSON

1 CARER

- 1** Carer to fold and roll slide sheet.
Until almost entirely folded.
(If using a Looped Slide Sheet, start fold from the closed edge.)

- 2** Carer to place Slide Sheet (with rolled section downwards against the bed) under persons head, sliding underneath pillow, or under persons neck.

- 3** Carer to unroll folds of slide sheet, one section at a time.
Carer to move to the opposite side of the bed, as often as is required, to ensure slide sheet is unfolded on both sides.

- 4** Repeat, keeping movements small, until slide sheet is completely unrolled.

- N.B.**
- If bed side rails are in situ, lower prior to fitting slide sheet.
 - Ensure bed is at appropriate height for carers.
