

B27 PADDED 4-WAY BED MANAGEMENT SYSTEM GENERAL GUIDANCE

- Carer to ensure that sheets are fitted correctly before attempting movements.

Base sheet to be strapped to mattress, and top sheet (handles side down) above it.

● RAISING CURTAIN

To raise 'curtain' (middle section of base sheet). Carer to lift top sheet and locate handles of base sheet, carer to walk towards the head of the bed holding the handles.

● LOWERING CURTAIN

Carer to lift top sheet and locate handles of base sheet, carer to walk towards the foot of the bed holding the handles.

1 CARER – Carer to move to other side of bed, and repeat small movements, as many times as required.

2 CARERS – to stand either side of the bed, and co-ordinate movements.

N.B. • Bed side rails to be lowered prior to re-positioning on bed.

• Ensure Curtain is lowered before leaving client on the bed.
