

Right to Erasure – Meeting Article 17 requirements

*6 Make a Request to Remove Data

- Where the data has been made available in online environment:
- Inform the other data controller and take reasonable steps to take down the information.
- Where the data is in electronic format on a system:
- If a valid erasure request is received and no exemption applies then the service will have to take steps to ensure erasure from backup systems as well as live systems. Those steps will depend on how the Trust uses the data, retention schedule (particularly in the context of its backups), and the technical mechanisms that are available.
 - The Service must be absolutely clear with individuals as to what will happen to their data when their erasure request is fulfilled, including in respect of backup systems.
 - It may be that the erasure request can be instantly fulfilled in respect of live systems, but that the data will remain within the backup environment for a certain period of time until it is overwritten.
 - The key issue is to put the backup data 'beyond use', even if it cannot be immediately overwritten. The service must ensure that they do not use the data within the backup for any other purpose, ie that the backup is simply held on the systems until it is replaced in line with an established schedule. Provided this is the case it may be unlikely that the retention of personal data within the backup would pose a significant risk, although this will be context specific.

*7 Inform Data Subject on outcome

- When Request is refused the service must inform the requestor without undue delay and within one month of receipt of the request the following:
- the reasons the service is not taking action;
 - their right to make a complaint to the ICO or another supervisory authority; and
 - their ability to seek to enforce this right through a different data controller.

*1 Vetting and Scoping

- Disclosure Team to
- Check the Identity of the requestor.
 - Check the Address of the requestor
 - Check if data in scope is personal data.
 - Check What information the requestor wants deleting.
 - Check if the details have been provided to identify the information. If not, liaise with the requestor to identify the information. Onus is on the requestor to bring the information to the notice if the Trust.

*2 Check grounds for request cited

- Disclosure Team to ensure that the requestor has cited the grounds for erasure.
- Example:
- the personal data is no longer necessary in relation to the purpose for which it was originally collected;
 - the processing is based on consent and consent is withdrawn (and there is no other legal ground for the processing);
 - the data subject objects to the processing and there are no overriding legitimate grounds for the processing;
 - the personal data was unlawfully collected;
 - the personal data has to be erased in order to comply with a legal obligation;
- Identify Service area

*3 Identify the source data

- Service area to:
- Check if the requestor has a legitimate right to make the request?
 - Track all copies of the paper and electronic record
 - Check if there any established relationships that will get affected if the record is deleted?
 - Check if Information is held in backup systems (may stay on back ups until over ridden), achieved systems as well as off site Storage?
 - Check of there are any there party processors
 - Understand if the request manifestly unfounded or excessive.

*5 Manifestly Unfounded

The Service must consider the request in the context in which it is made, and is responsible for demonstrating that it is manifestly unfounded.

The Servicemust not presume that a request is manifestly unfounded because the individual has previously submitted requests which have been manifestly unfounded or excessive or if it includes aggressive or abusive language. The service must consider the specific situation and whether the individual genuinely wants to exercise their rights.

*4 Is request valid?

- Service area to assess if;
- The data is being used to exercise the right of freedom of expression and information.
 - The data is being used to comply with a legal ruling or obligation.
 - The data is being used to perform a task that is being carried out in the public interest
 - The data being processed is necessary for public health purposes and serves in the public interest.
 - The data being processed is necessary to perform preventative or occupational medicine. This only applies when the data is being processed by a health professional who is subject to a legal obligation of professional secrecy.
 - The data represents important information that serves the public interest, scientific research, historical research, or statistical purposes and where erasure of the data would likely to impair or halt progress towards the achievement that was the goal of the processing.
 - The data is being used for the establishment of a legal defence or in the exercise of other legal claims.
- Please take advice from DPO or Legal Team if unsure.
